Setting Trusted Sites in Internet Explorer

The Trusted Sites settings allow you to selectively indicate which web sites are to be trusted, meaning they can run at a low security level.

Click on the Tools menu and select Internet Options. Click on the Security tab. Now, click on the green circle with a white check marked Trusted Sites. Uncheck the Require server verification (https:) for all sites in this zone. In the space provided, enter the address of the websites, for Blackboard Vista *.blackboard.com. Click the Add button. Enter the second site, myCommNet, *.commnet.edu. Click the Add button. Enter the third address for the Community College Help Desk, *.parature.com. Click the Add button. If you use e-Portfolio or e-Tutoring enter the following address, *.ctdlc.org. Click the Add button. When finished click OK and OK again, to close the Internet Option window.
