Spring 2017

Ann Morgan at OSE Recognized as Outstanding Supervisor

On March 20 Julie Greene, Director of Career Services, presented a Certificate of Appreciation to Ann Morgan at the Office of State Ethics on behalf of the Cooperative Education program. Ann is currently hosting two MCC interns, Taj Herman and Joy Aklibosu of Manchester who are both Computer Networking Technology students. In years past, she has also hosted Computer Science and Management Information Systems students. This is the third year that Ann has been accepting interns from the MCC Cooperative Education program. "Ann has always been extremely supportive of our interns, making great efforts to ensure that the projects and tasks they undertake contribute to their skill progression and overall career development," said Julie.

Apply for Summer and Fall Internships

The Spring semester is coming to a close and Summer is quickly nearing. Now is the best time to start applying for internships and cooperative experiences for the Summer and Fall 2017 semesters. The program seeks to place students in co-ops and internships that will suit their needs, so students should apply while there are plenty of open positions.

Ann Morgan poses with Julie Greene

Co-op education and internship courses are available to almost every MCC student.
